O teste falhou

The screenshot shows the Eclipse IDE interface with the following components:

- Package Explorer:** Displays the project structure for 'br.com.cwi.automation_training.tests.SikuliTest'. The test scenario 'Cenário: Realizar soma na calculadora do Windows 8 com Sikuli - Da' is selected.
- JUnit Console:** Shows the test execution results. The test failed with the message: 'SikuliTest [JUnit] C:\Program Files\Java\jdk1.8.0_144\bin\java.exe'. The console output includes several log messages from the Sikuli framework, such as 'INFO: Registering type org.sikuli.util.SysNA\$' and 'INFO: Registering type org.sikuli.util.SysNA\$'.
- Failure Trace:** Displays the stack trace of the failure, starting with 'java.lang.AssertionError: expected: 20, but was: 10'.
- Windows Calculator:** A Windows 8 calculator window is open, showing the result '0'.

The Windows taskbar at the bottom shows the system clock as 22:41 on 24/10/2017.
